

## KISHORE CHOUDHURY

Phone: +918123288982

Mail to: [kishorechoudhurydeb@gmail.com](mailto:kishorechoudhurydeb@gmail.com)

### Objective

Seeking a role where my skills will be fully utilized and where I will contribute to the growth of the organization and develop further as a software developer.

### Technical Skills

- Experience with Java frameworks and libraries ( Spring Boot, Apache log4j2, Hibernate, Jackson )
- Experience with REST web services.
- Experience with client side technologies like Angular, Javascript, jQuery, CSS, Bootstrap.
- Experience with server side technologies like JSP.
- Experience with version control systems like GIT and SVN.
- Experience with static code analysis tools like Sonar.
- Experience with build tools like Maven.
- Experience with Agile tools like Rally, Jira.
- Experience with collaboration software programs like Confluence.
- Experience with databases like Oracle 11g and Postgres.jboss
- Experience in performance tuning
- Experience in troubleshooting and configuration of various web and application servers like Tomcat.
- Experience in preparing technical documents, requirement documents.
- Proficient with SonarQube.
- Proficient with IDEs like Eclipse and VS Code.
- Working knowledge of Express and React.

### Work Experience Summary

*August 2020 – Present (Broadridge Financial Solutions)*

- **DVWEB** – Standalone app to perform reconciliation of financial data from different streams. Front end is built with Angular while Java and SpringBoot is used at the backend.. Responsible(Team Lead) for requirement gathering, development and deployment activities.

Environment – Java, Spring Boot,Angular8, JIRA, Jenkins

Responsibilities: I am the Technical Lead in DVWEB project. I work on requirement gathering, development and deployment. Implemented design patterns such as DAO and MVC. Designed strategies and processes to

improve UI performance and UI load times. Implemented UI libraries for custom functions like exceljs,etc. Optimized some DVWEB functionalities for all browsers(including older versions). Designed and implemented file upload/download functionality., reports. Prepared sanity testing documents.

*April 2020 - July 2020 (TCS)*

- **COI** – Web application which manages conflicts within client organization. The application This application works with Spring in the backend, Oracle as the database and JSP along with jQuery in the front end.

Environment – Java, Spring Boot, Oracle 11g, JSP, jQuery, SonarQube, Confluence\

Responsibilities: I was part of the development team which built a new page in COI application. Implemented Restful web services and JBDCTemplate and RowMappers was used for data access and data mapping. Analyzed code to reduce complexities. Designed workflow using Activiti workflow engine. Provided mentorship to juniors, planned activities for the development team and did code review for all requirements.

### *March 2018 – March 2020 (TCS)*

- **FDS** – Web application which allows users to pull reports across various business segments for employees within the client organization. Spring Boot is used for the business logic and the Angular framework in the presentation layer. Agile.

Environment – Java 8, Spring Boot, Spring Data Jpa, JDBC template, Ehcache, Sonar, Git, log4j2, Angular, Oracle, Rally

Responsibilities: Was the SPOC FDS. Here I was responsible for client side and server side development. Implemented design patterns like DAO, Proxy and MVC. Responsible for sanity testing along with preparation of technical documents for new features to be implemented. Used Quartz to automate jobs. Being the SPOC was the responsible for code review as well. Greatly improved UI experience and reduced load times.

### *October 2017 – March 2018 (TCS)*

- **ASK Project** – ASK application is a question and answer portal for employees within the client organization. Spring Boot in backend and Angular 5 in front end. Agile.

Environment – Java 8, Spring Boot, Redis caching, Spring Hibernate, Git, Logging, Angular, Postgres, Jira

Responsibilities: I was part of the initial development team. Used Angular with bootstrap for the UI. Implemented Hibernate. Worked with restful web services to get data from various modules. Integrated Sonar with code base. Analyzed business requirements and come up with solutions. Worked in agile setup. Did multiple code reviews as well.

### *May 2017 – October 2017 (TCS)*

- **GAMS** - ERP support project. Oracle Apps R12 was supported by our team (including modules like Payables, Receivables, etc.)

Environment : Oracle Apps R12, PL/SQL Developer, Oracle Database 11g.

Responsibilities: I was part of the support team here. Performed RCA on a number of issues. Also worked on the Value Chain Supply module. Predominately, used PL/SQL for day to day tasks (Stored Procedures).

### **Certifications**

‘ **Certified Android App Developer Training** ‘ from **Simplilearn** issued on Sep 2018 after completing the coursework.

#### Academic Qualifications

- **B.E in Mechanical Engineering** from **VTU (BELAGUM), India** in 2016.
- **MBOSE (10+2)** from **St.Edmunds College, Shillong,Meghalaya, India** in 2012.

- **ICSE (10) from St.Edmunds School, Shillong,Meghalaya in 2010.**

## ORGANIZATIONAL DEVELOPMENT

Organized and conducted Java and Spring Boot trainings. Implemented features of Java in mid to high level of complexity and used a wide set of Java libraries.

## PROFESSIONAL DEVELOPMENT

Lead development activities in projects and worked closely with clients and all major stakeholders in requirement gathering, analysis, planning and delivery in an Agile environment. Attended multiple trainings and workshops and mentored junior developers and helped them understand required workflows, tools and tasks that are required to be performed.
