

---

### **Career Objective:**

To secure a challenge in position where I can effectively contribute my skills as software professional, possessing competent Technical skills.

### **Professional Summary:**

- Having 4.3 years of IT experience in developing Web and Enterprise Application using Java/J2EE, spring and Hibernate.
- Good knowledge of **Object Oriented Programming** concepts.
- Hands on experience in core Java, JDBC, Servlets, JSP, JavaScript and Hibernate.
- Strong hands on experience in implementing Design patterns like **MVC, Singleton, Data Access Object, DTO, Service and Factory**. Having experience with **Configuration Management tools** like **SVN, CVS, RTC**.
- Hands on experience in spring and Frame works.
- Hands on experience in **designing** and **developing** distributed and multithreaded applications with **technologies** such as core and advanced **Java technologies** Excellent analytic, logical and programming skills.
- Hands on experience in SQL database.
- Good team member, positive attitude and result oriented Self-motivated, quick learner, willing to adapt to new challenges & new technologies (web services, spring and hibernate).

### **Professional Experience:**

- Working as Software Engineer in **Blue Star InfoTech Ltd**, From July 2018 to till date.
- Worked as Software Engineer in **Zen Technologies Ltd**, From June2016 to June2018.

### **Technical Skills:**

- |                         |   |  |
|-------------------------|---|--|
| ▪ Programming Languages | : | Java   |
| ▪ JSE Technologies      | : | Jdbc   |
| ▪ JEE Technologies      | : | Servlets and JSP                                     |
| ▪ Web Technologies      | : | Html ,CSS and Java Script                            |
| ▪ Frame Works           | : | Spring, Spring Boot, Hibernate, Web service Restful. |
| ▪ Framework Modules     | : | Core Module,<br>Spring ORM, Spring MVC.              |
| ▪ ORM Tool              | : | Hibernate  |
| ▪ Database              | : | SQL  |
| ▪ Web server            | : | Tomcat.  |
| ▪ IDE                   | : | Eclipse  |
| ▪ Operating System      | : | Windows Family                                       |
| ▪ Others                | : | MS Office, Linux, SQL                                |
| ▪ SOA(Web Services)     | : | JAX-WS, Restful(Jersey 1.11)                         |
| ▪ Tools                 | : | Log4j, Maven, SVN Repository,<br>Junit, Http unit.   |

### **Projects:**

#### **Project 3**

Project Title : Web-Base Warehouse Management System.

Position : Java/J2EE Programmer.  
Duration : August 2019 to till date.  
Team Size : 5

### **Project Description:**

Warehouse Management System is a web based and web centric application which caters the need of 3<sup>rd</sup> party logistics provider and providing warehousing and distribution services to its customers. It provides inbound services like purchase order, vendor invoice, GRN (Goods Receipt Notes) and also outbound service shipment order, sales, pick services.

### **Environment:**

- J2SE and J2EE
- Spring Boots, spring, Hibernate, Restful web Services.
- HTML, CSS, JavaScript, jQuery, JSP
- Eclipse IDE.
- Maven, Log4J.
- SVN Repository, Junit.
- Oracle Database.

### **Responsibilities:**

- Participated in discussions with team member.
- Analyze the system requirements (SRD)
- Involved in the designing of activities.
- Developed user friendly and secure application
- Coded all the modules required for this application
- Developed confirmation mail system using java mail..
- Involved to implement the spring boots.
- Involved to implement the restful web services.
- Writing the Business logic for given activity.
- Implemented Hibernate Components.
- Also designed overview of page using spring forms.
- Doing the Code reviews.
- Test the Developer test cases and doing the unit testing.

### **Project 2**

Project Title : Acapulco  
Client : IUSA Cell (Mexico)  
Position : Java/J2EE Programmer.  
Duration : July 2018 to July 2019  
Team Size : 4

### **Project Description:**

Acapulco is #3 among Mexico mobile Service Providers. The company provides cellular services reaching about 90% of Mexico's population, including Mexico City and received more licenses to cover the remaining regions in early 2005. It has more than 3.5 million subscribers (67% are prepaid), equivalent to approximately 7% of the wireless telecommunications market in Mexico. The company also offers local and long-distance telephony, messaging services, mobile television and wireless broadband services (BAM) over the only 3G nation-wide network in Mexico. In 2010, based on IBM's experience with complex Telco accounts, large-scale transformations and leadership in best practices, Acapulco entered into a strategic outsourcing deal to let IBM manage its overall IT infrastructure and facilitate the company's rapid business growth. A set of programs were targeted with the objective to prioritize the reduction of existing churn and effect increased market share. The Acapulco Enterprise has been broadly categorized into separate functional domains, consistent with Telecom Management Forum's eTOM domains and TAM applications framework. Additional domains for SDP and Network Service were added to capture the complete scope of lusacell's infrastructure. The Acapulco account includes:

### **Environment:**

- J2SE and J2EE
- Spring, Hibernate
- HTML, CSS, JavaScript, JSP
- Eclipse IDE.
- Maven, Log4J.
- SVN Repository, Junit.
- SQL Database.

### **Responsibilities:**

- Used Spring Framework for Dependency injection.
- Implementation of Webpages in JSP using Spring Form Tag Library.
- Involved in developing JSP forms and navigation using View Resolver.
- Used Spring Hibernate for Querying data from the database.
- Involved in developing Controllers using Spring MVC.
- Implementation of Webpages in JSP using Java Script for validations.
- Implementation of Web Pages using JSP and HTML.
- Implement the **code** as per **design**. Developed the **business logic**.
- Develop the site and integrating the **dynamic pages** with the **static designs**.

### **Project 1**

Project Title	:	Effort Tracker System
Client	:	ETS
Position	:	Java/J2EE Programmer
Duration	:	June2016 to June2018
Team Size	:	6

### **Project Description:**

This is web-based project where any registered user can login and find the information facility to define the projects in the organization and also allows tracking the efforts spent by the employees for that particular project related task. Effort Tracker System (ETS) is an automated system that can be useful to employees, team leads and managers in any functional organization.

This tool can help managers for effort estimation per project. This tool helps employees to document their efforts to analyze.

**Environment:**

- J2SE and J2EE 1.7
- Spring, Hibernate
- HTML, CSS, JavaScript, JSP
- Eclipse IDE.
- Maven, Log4J.
- SVN Repository
- Junit
- MySQL Database.

**Responsibilities:**

- Used Spring Framework for Dependency injection.
- Implementation of Webpages in JSP using Spring Form Tag Library.
- Involved in developing JSP forms and navigation using View Resolver.
- Used Spring Hibernate for Querying data from the database.
- Involved in developing Controllers using Spring MVC.
- Implementation of Webpages in JSP using Java Script for validations.
- Implementation of Web Pages using JSP and HTML.
- Implement the code as per design. Developed the front-ends in JSP, HTML and JavaScript. Created Java Beans to capture business logic.
