PROFESSIONAL EXPERIENCE

Intellect Design Arena Ltd (Senior Consultant), Chennai

June 2018–Present

Canvas Technology - A low-code platform to enable rapid development of enterprise web applications.

- Worked as back-end developer in canvas technology. Designed and developed an interface for different types of connection (DB, REST API's, IBatis SqlMap).
- As a back-end developer enabled different features and module in the canvas framework.
- Integrated different types of the Authentication over the product (ARX, OAuth).
- Created a module which allows the user to create different types of grids, form, charts and reports in the framework.
- Reviewing developers code to improve performance and scalability of the application.

Sigma – A Cloud Native Web Reporting Application to enables on the fly report creation from multiple systems for multiple output formats.

- We have developed a user-friendly report generating tool which is capable of handling bulk data of different formats.
- Worked as back-end developer in sigma product, Developed REST API's (Report Generation, Download), Performed Code Review for product to enhance performance.
- In sigma we support multiple servers for implementation. In Each server we faced multiple challenges during the deployment. During the deployment observed server behaviour and provide the fix accordingly.
- Am the POC for various complex reports and enabled this feature in the sigma product.

ACCOLADES

Recognised with GEM award from CANVAS project, KONARK award at Intellect design arena for the product contribution.

RydSoft (Software Engineer), Chennai

Oct 2015–May 2017

CAMS - pioneer and global leader in Biometric R&D. CAMS offers Web API for biometric attendance devices, biometric access control devices, fingerprint scanners, finger vein scanners, iris scanners for integrating with Web Application.

- Have been a Full stack developer in CAMS Product.
- Developed different APIs for CAMS Product (Biometric Attendance API, Fingerprint API).
- Also, Part of bug fixing team for fixing existing and common issues.
