

- JAVA professional having 9 years of experience in development of web based and Enterprise application.
- Having Experience in Java with Framework **Spring, Hibernate, Servlet, JSP, RESTFUL Web Services and Microservices**
- Hands-on experience and profound knowledge of JAVA web application programming, production development and support.
- First-rate analytical and problem solving skills dedicated to maintaining high quality standards
- Skilled in understanding client requirements, developing solutions, ensuring delivery of reviewed / executed work requests within timeframes, maintaining application and technical support.

CORE STRENGTHS

- Software Development Life Cycle (SDLC)
- Software UnitTesting
- Coding
- Faster Production issue analysis and fix
- Application Development & Maintenance
- Requirement Gathering & Analysis
- Project Co-ordination

TECHNICAL SUMMARY

JAVA	Java-7 & java-8,J2ee, RestFul Webservice, Microservice
JAVA Frameworks	Spring ,Hibernate
Web-Based Technologies	HTML,CSS
Scripting Languages	JavaScript,JQuery,AJAX
Oracle Skills	Oracle SQL, PL/SQL Programming.
Databases	Oracle,MySql
Tools	Jasper IReport ,Oracle SQL Developer, MySQL Query Browser,Eclipse IDE,ANT,Maven, SVN,CVS, WSDL,GIT,JIRA,Jenkins,XL Deploy
Operating Systems	MS Windows XP/ windows 7,Windows 10
Web/application Server	Web logic(10.3.6) ,Apache Tomcat7

- Solid background in Object-Oriented analysis and design.
- Firm understanding & implementation of MVC architechture.
- Good Work experience in frameworks like **Spring (IOC, MVC, ORM, JDBC, Spring Batch module) and Hibernate.**
- Having the experience on writing **JUnit** Test case **TDD ,BDD** and **Log4J** for logging mechanism.
- Good Understanding of **Design patterns ,Microservices.**
- Good work experience in **Exception Handling .**
- Having Good work experience in using **JSON .**
- Having good exposure in **HealthCare** and **Banking** Domain.
- Having good work experience in Code Quality Tool like **Sonar.**
- Having work experience in **Spring Boot and Spring Cloud(Eureka).**
- Having work experience in **Java AWT ,SWING client based application.**
- Extensive in Programming J2EE applications using **Java, JDBC, Servlet, JSP.**
- Having Good work experience on IDE like **Eclipse, My Eclipse, IntelliJ IDEA and STS.**
- Good understanding of Microservice Architecture.
- Good experience in root cause analysis and fixing prod issues.
- Good experience in **Agile** Practices.
- Having Knowledge on Reactive programming using **WebFlux.**

EMPLOYMENT CHRONICLE

CAREER PATH	DURATION
Senior Software Engineer at Societe Generale Global Solutions Centre Pvt. Ltd, Bangalore.	OCT 15 till Date
Software Consultant at Etisalat Software Solutions Pvt. Ltd , Bangalore.	SEPT' 14 to OCT 09 15
Software Developer at Bms Innolabs Software Pvt. Ltd , Bangalore	JULY '12 to AUG'14

Key Deliverables:

- Gather and analyze requirements, understand end-to-end application functional specifications and devise / build strategies based on project needs
- Develop new applications / software while maintaining and enhancing existing applications
- Define, document, analyze, study and review project status along with developing programs, applications and enhancements based on agreed SLAs
- Review & edit requirements, business processes and recommendations related to proposed solutions
- Work with the team in building a complete deliverable product by integrating various portions created during the development cycle
- Provide functional / technical support and monitor quality ensuring delivery within time frames
- Provide high-end development solutions and troubleshoot all issues related to development, implementation and deployment of applications / software
- Understand the business functionality, business requirements and technical specifications of the applications / clients ensuring strict adherence to the same
- Attend to & resolve all technical issues accurately and promptly

PROJECTS HANDLED SUMMARY

PROJECT# 6:

Product Title : client-kyc-snapshot-service
Tools & Technology : Java 8, Spring Boot, Spring Data, Microservice, Spring Security, OAuth2, RESTful Web Services , Oracle , , GIT, JIRA, Design Pattern.

Description: This API is exposed to provide post closing deal's client data for the following category of clients - Borrower, Business Provider, Deal Guarantor, Facility Guarantor, Sponsor, Obligor, Exporter and Syndication Member.

Overall Accountabilities in the project:

- Responsible for planning, processing and performing all jobs in an efficient manner with no assistance from the supervisor
- Review and repair code.
- Design and develop programming systems making specific determinations about system performance. Responsible for designing and development of the activities.
- Responsible for doing Unit testing.
- Responsible for maintaining the continuous integration and continuous delivery.

PROJECT# 5:

Product Title : CPM(Credit Portfolio Mgmt.)
Team Size : 9
Tools & Technology : Java 7, Spring loc, Spring Batch, Core java, AWT, SWING, RMI, Tomcat server, Spring Boot, Hibernate, Oracle

Description: CPM is a data center or data repository kind of project. It has two sections. One is a client server application which gives the credit forecasting information to the bank users against every loan or deal. Other part is having more than 60+ spring batches which are responsible for processing different kinds of data and data transforming according to the business rule. CPM has many upstream applications as well as many downstream applications. Client-server application shows different credit forecasting information at different levels like deal, facility, drawdown..etc at monthly, quarterly and yearly basis. It also calculates and displays client (Entity who has taken loans from SG) info as well as client's creditworthiness. It is a golden source for providing credit related info to many downstream applications.

Responsibility: Involved in Requirement analysis with BAs, Slicing stories and giving item estimation, Development, Handling project releases with Operation team, Dev Testing and Production Support and also involved in coordination of the complete project.

Overall Accountabilities in the project:

- Understanding the requirements of project .
- Responsibilities for implementing Business logic.
- Involved in the developing Controller classes, service layer classes, DAO layer classes.
- Involved in **Data base Designing and Hibernate mapping.**
- Involved in developing application Business logic .
- Involved in developing DAO layer using Hibernate.
- Handling **Exceptions** .
- Involved in Unit testing using Junit(TDD/BDD) .

PROJECT# 4:

Product Title : AdminConnect
Team Size : 10
Tools & Technology : Java 6, Rest Web Service Mjackson, Phone gap and Mobile native API, Sharepoint Server, Spring 4(REST), Hibernate 4, Weblogic11g

Description: Adminconnect is replica of etisalat internal portal for employee services hosted on share point .It includes various services like travel request, internal travel duty and other admin related activities .AdminConnect is a mobile application for all platforms (android, iphone, blackberry, windows mobile).

Responsibility: Involved in Analysis Design, Development, Testing and Production Support and also involved in coordination of the complete project.

Overall Accountabilities in the project:

- Understanding the requirements of project .
- Responsibilities for writing **Spring Controller, Bean and Model** classes.
- Designed and developed various JSP's using JavaScript .
- Involved in the developing Controller classes, service layer classes, DAO layer classes.
- Providing Rest Full webservice to Mobile Application Development Team with **JSON** response.
- Involved in **Data base Designing and Hibernate mapping.**
- Involved in developing application Business logic .

- Involved in developing DAO layer using Hibernate.
- Handling **Exceptions** .
- Involved in Unit testing using Junit .

PROJECT# 3:

Product Title	:HRConnect
Team Size	:10
Tools & Technology	:Java 6, Rest Web Service , Phone gap and Mobile native API, Sharepoint Server, Spring 3, Jsp,Hibernate 4, Weblogic11g

Description: HRconnect is replica of HRMS system which was developed for employees' engagement and consists of all employees' related activities like leaves, payslip etc. It is used by etisalat division. HRConnect is a mobile application for all platforms (android, iphone, blackberry, windows mobile).

Responsibility: Involved in Analysis Design, Development, Testing and Production Support and also involved in coordination of the complete project.

Overall Accountabilities in the project:

- Responsibilities for writing **Spring Controller,Service and Model** classes.
- Involved in Analysis and gathering Requirements from Client.
- Providing Rest Full webservice to Mobile Application Development Team with **JSON** response.
- Involved in **Data base Designing and Hibernate mapping**.
- Involved in **Writing Junit Test Classes** with proper data validation.
- Involved in implementing business logic using **Spring bean**.
- Involved in mapping relationship and implementing DAO layer methods using **Hibernate**.
- Involved in Server side and Client Side Validation

PROJECT# 2:

Title: **VitalBeat**
Team Size: **9**

Environment:Spring MVC,Hibernate,Weblogic Server,Spring Rest ,Json,MySQL,JavaScript,Jquery,Ajax,JSON.

Description: VitalBeat is an easy to use Integrated Chronic Disease Monitoring and Management system for improving quality of life. Clinicians and patients living with long term chronic conditions CHF, Diabetes, Hypertension, Pain, COPD, CKD and co-morbidities can monitor vitals and long term health at their convenience based on guidelines.

VitalBeat is a mobile health application tailored to manage personalized health goals, record Blood Pressure, Weight, Pulse Rate, Breathing Rate, Glucose and many other vital sign measurements. This patient-centric tool ensure the right patient tracks the right metrics, gets the right education and Therapies anytime and anyplace. Patients, clinicians, healthcare providers,payers and pharma partners securely record, share and manage chronic diseases remotely to stay healthy and improve measurable outcomes using informatics and predictive analytics. Users can manage diet and medication compliance by configuring alerts and reminders based on thresholds, goals and clinical requirements.

Overall Accountabilities in the project:

- Understanding the requirements of project.
- Designed and developed various JSP's using Jquery and **Ajax**.
- Involved in the developing Controller classes, service layer classes, DAO layer classes.

- Involved in developing application Business logic .
- Involved in developing DAO layer using criteria api.
- Handling **Exceptions** .
- Integrated Spring mail notification for user.
- Integrated Sms gateway for sending message to the Patient .
- Involved in Unit testing using Junit .
- Did **Client side validation** in jsps for html files using **jquery** validation plugings and Javascript and **Ajax** .

PROJECT# 1:

Title: GSN (Global Sync Network)

Team Size: 14

Environment: Spring MVC,Servlet,Jsp,Spring RestFul webservice,Hibernate ,Java Script,JQuery,Ajax,MySql,Tomcat7.

Description: Gsn is a contact management and information sharing application. It is a multi platform mobile application that encourages interaction among users along with a host of other features including chat, status messages and receiving notifications of latest updates. This application will enable users to easily store contacts and share information in Real Time in a more agile manner. With the unique GSN number generated for each user, this application can be used to stay connected with other GSN users. Using this application we can add, remove contacts ,share information with other contact securely.

Overall Accountabilities in the project:

- Understanding the requirements of project.
- Designed and developed various JSP's using JQuery and **Ajax**.
- Involved in the developing Controller classes, service layer classes, DAO layer classes.
- Involved in developing application Business logic .
- Involved in developing DAO layer using criteria api .
- Involved in Implementing many-to many Chatting functionality for users.
- Involved in Unit testing using Junit .
- Did **Client side validation** in jsps for html files using **jquery** validation plugings and Javascript .
