Career Objective

Seeking a challenging job in Software Development in a company where my skills and experience can grow & contribute in better growth and success of company.

Professional Summary

- **Having 7+ years of experience** in IT Industry. Have good knowledge on Design and Development using Java Technology with MVC Architecture and Web Technologies.
- Areas of Technical expertise include Web Application Development skills using JSE, J2EE.
- Good database connectivity skills in Oracle and MySql.
- Have strong knowledge on Core Java, MySQL, Spring MVC, Hibernate, Spring Restful, Spring boot and microservices.
- Experience in Developing J2EE applications on Java IDEs (Eclipse, Net Beans, Intellij).

Experience Profile

- Working for **Virtusa**, Bangalore as Senior Software Engineer from February 2019 to till date
- Worked for **Accenture**, Bangalore as Senior Software Engineer from October 2016 to till February 2019
- Worked for **Infosys Ltd**, Bangalore as Senior System Engineer from January 2015 to October 2016
- Worked for **SLV Technologies**, Hubli as a Software Engineer from June 2012 to December 2014.

Technical Proficiencies

SKILL	Experienced	Awareness
Programming Languages	JAVA/J2EE	C, C++
Operating System	Windows	Linux
DB s/w s	MySQL, Oracle	
Web Technologies	HTML, JavaScript, JSON	JQuery, AJAX
JSE Technologies	JDBC	
JEE Technologies	Servlet, JSP	
Servers	Tomcat	Glass Fish, JBoss
Frameworks	Spring	
ORM s/w s	Hibernate	
IDE's	Eclipse, Net Beans, IntelliJ	
Webservices	Restful	
Tools	Log4j, Maven, SVN	ANT

Project #5: (Current Project)

Title	**NGAutofix**
Client	BT (British Telecom)
Team size & Role	12 & Developer
Technologies	Core Java, Spring Boot, Microservices, Spring data jpa, JSON, JDK (1.8), Eclipse, Oracle, Maven, Log4j

Project Description:
 NGAutofix (Next Generation Auto fix) is a kind of ticketing tool, it involves various types of tickets like SR (Service Request), IR(Incident Record), PR(Problem Record) and IN(Interaction). This application cable to handle these 4 kinds of tickets.

Role & Responsibilities

- ➢ Involved in understanding the requirements and estimating the efforts required.
- ➢ Involved in designing the Requirement Specification Document for the technical approach of the solution.
- ➢ Written the Sqoop Script to transfer Huge data.
- ➢ Written hive queries to perform analytics on Huge amount of data.
- ➢ Co-operated and coordinated with other teams to make sure smooth delivery.
- ➢ Organized daily meetings/catch up calls to update my status from Offshore and to get the same from other teams.
- ➢ Update the status to team lead as requirement completed.
- ➢ Client interaction when it's needed.

Project #4:

Title	**USCellular**
Client	USCellular
Team size & Role	15 & Developer
Technologies	Core Java, Spring MVC, Hibernate, JSON, JDK (1.6), Restful Services, Eclipse, Oracle

Project Description:
 U.S. Cellular is the fifth-largest full-service wireless carrier in the United States, providing national network coverage and industry-leading innovations designed to elevate the customer experience. The Chicago-based carrier offers coverage where the other carriers don't and a wide range of communication services that enhance consumers' lives, increase the competitiveness of local businesses and improve the efficiency of government operations. U.S. Cellular has the Highest Wireless Network Quality Performance in the North Central Region, according to J.D. Power, and 99 percent of customers have access to 4G LTE speeds

Role & Responsibilities

- ➢ Involved in understanding the requirements and estimating the efforts required.
- ➢ Involved in designing the Requirement Specification Document for the technical approach of the solution.
- ➢ Written the Sqoop Script to transfer Huge data.

- ➢ Written hive queries to perform analytics on Huge amount of data.
- ➢ Co-operated and coordinated with other teams to make sure smooth delivery.
- ➢ Organized daily meetings/catch up calls to update my status from Offshore and to get the same from other teams.
- ➢ Update the status to team lead as requirement completed.
- ➢ Client interaction when it's needed.

Project #3:

Title	**RPA** (Rapid Process Automation)
Client	WellsFargo
Team size & Role	8 & Developer
Technologies	Java, Spring, Hibernate, Restful Services and Drools

Project Description:
This application involves automate the operational process. Existing process is completely manual process. This application having two modules DAP (Default Account Process) and IAT (Income Analytics Tool).

Project #2:

Title	**STM** (Straight Through Margin)
Client	Goldman Sachs
Team size & Role	9 & Developer
Technologies	Java, Spring and Hibernate

Project Description:
This application enables auto lock feasibility for an account whether firm good to issue Margin call or not. STM will consume JMS message from Queue, build the portfolio details for an account, do the validations by running certain predefined rules and publish message to Queue. Then downstream systems will consume STM response messages.

To achieve this, complete design and drawing of different flow diagrams has been made under guidance of team lead.

Project #1:

Title	**DPWHO** (DPW Housing Organization) Duration- Feb 2014 to Dec 2015
Client	DPWHO. Delhi
Team size & Role	5 & Developer
Technologies	JAVA/J2EE, HTML - 1.0, JSP - 2.0, Struts - 1.3.10, Hibernate and MySQL.

Project Description:
The DPW Housing Organization (DPWHO) application handles the construction information of flats and sites, the main role of this application is to maintain the

information about the selling flats and sites and isolate the paying processes such as finance and loan wise procedures based upon customer.

Role & Responsibilities

- ➢ Understanding requirements given by team lead.
- ➢ Developing the application based on requirement.
- ➢ While developing always thinks on client side, and server burden.
- ➢ Unit test the requirement after completion.
- ➢ Update the status to team lead as requirement completed.
- ➢ Client interaction when it's needed.
