# Gini Paul
**SENIOR TECHNICAL LEAD**

## CAREER OBJECTIVE

Seek to explore my knowledge in the challenging and creative atmosphere where my analytic, application knowledge and problem solving skill can be put for mutual growth of the company and myself

## ABSTRACT

Having 5 years and 11 months of experience into software development with different languages. Having good knowledge and experience in both front end (GUI) & backend modules of the projects.

Having good communication skills to interact with my team members to understand the requirements & share the idea to reach the expected requirement.

## EXPERIENCE

- Software engineer (July'16 to Present)
  at Tayana Software Solutions Pvt. Ltd, Bangalore, Karnataka-560025.

## TECHNICAL SKILLS

Programming Languages    :  Java, Spring Boot,RESTful Webservices, SOAP, JSP, HTMLJavscript & Shell Scripts.

Server Details                    : Linux/Unix (RHEL & & Centos)

DB Interactions                 : MySQL, Oracle, Mapd, PLSQL

## TECHNICAL AREAS

- **BACKEND DEVELOPMENT:**

    Worked in main modules of the projects under Java languages,Spring Boot,REST & SOAP Api with responsibilities of clean, effective, reusable and bugs free product development with documentations.

    Worked in Java modules for the database connectivity through JDBC connections to interact with GUI & backend modules.

- **FRONTEND DEVELOPMENT:**

    Worked in Graphical User Interface (GUI) of the projects using JSP, JavaScript, CSS, bootstrap, JQuery,Java for better user interfaces.

    Worked with 1 tier & 3 tier architecture from JSP files to java files to connect backend database to the operators UI. Worked with web services & Rest API for the achieving the same.

- **DATABASE HANDLING:**

    Worked with different databases (Mysql,Oracle) queries, procedures, packages, jobs , synonyms, sequences with different schema of same DB & also data synchronization across different database for the security & speed.

- **TESTING & VALIDATION:**

    Testing, validating the product against possible error simulations and functionalities & load test on the functionalities developed by team members & myself. Captured the test cases & prepared document for the same for further usage.

- **DOCUMENT PREPARATIONS:**

    LLD & HLD of different modules in a project with block diagram & functionalities.

    Test Report for each enhancements on the projects & bug fixes of existing project.

# PROJECTS

- **SRM :** Sim Registration Management

    SIM activation platform enabling the operator to capture subscriber KYC data/documents electronically, validate and store the documents based on its genuineness for regulatory needs and there after activate the subscriber SIM

- **WICP:** Wireless Intelligent Charging Platform

    The W-ICP system provides complete Charging and Billing solutions for Network Operators.

- **TSSGUI**

    A generic GUI framework which is used to in all the products as a base of GUI development
