Shivam Verma

Java Practice & Delivery

5 year of Industry Experience

OVERVIEW

A passionate Java Developer with 5 years of progressive experience in the IT industry, involved in complete SDLC including analysis design, development, testing, implementation, support and maintenance of enterprise-level applications using Java/JavaEE.

- Good experience in front end technologies like Javascript, Jquery, AngularJS, Bootstrap, CSS, and HTML5.
- Expertise in Java, Spring, Spring Boot, Hibernate, and Rest Web Services.
- Expertise in requirement understanding, design, development, debugging, and testing.
- Exposure to SDLC and Agile methodologies.
- Good interpersonal skills, commitment, result-oriented with a zeal to learn new technologies and undertake challenging tasks.
- A progressive learner of new technologies, ideas, concepts, and methodologies.

EXPERIENCE

InfoBeans Technologies Ltd

Senior Software Engineer - Java Practice

October 2020 - Present

InfoBeans, Indore, India

Software Engineer - Java Practice

November 2015 - Oct 2020

SKILLS

Java
(3.5/5)

Web Design
(3.5/5)

Web Server
(4/5)

Microservices
(2.5/5)

Information Architecture Design
(3.5/5)

System Design
(3/5)

TOOLS

STS, IntelliJIDEA, Jenkins, Eclipse, Maven

MANAGERIAL EXPERIENCE

Team Management
Client Engagement
Delivery
Management

EDUCATION & TRAINING

2015

Bachelors of Engineering(Computer Science), RGPV Bhopal
Global Nature Care Sangathan's Group of Institution,
Jabalpur

PROJECTS

Project 1 - November 2015 - March 2016
Virtual Volumes - Vvol

Tools & Technologies
Java, Spring MVC, Adobe Flex, Perforce, vCenter API

Team Size
4

Role
Associate Software Engineer

This project is for the management of FlexVolumes.VVOLs
are a provisioning feature that changes how virtual machines
(VMs) are stored and managed. Virtual Volumes enables an
administrator to apply a policy to a VM which defines the
various performance and service-level agreement
requirements. The VM is then automatically placed on the
storage array that fits those requirements

Responsibilities & Achievements:
- Handled the Build and Deploy of product
- Involved in the implementation of various defects
  and feature enhancement.
- Build Vvol application with Eclipse IDE.
- Provide estimation of tasks based on impact analysis

Project 2 - April 2016 - September 2016
IDTracker

Tools & Technologies
Spring, AngularJS, Hibernate, JSP, MySQL, RESTful Web
Services, Apache Tomcat, AWS S3, RDS, EBS, S3

DOMAIN

Storage Domain

PERSONAL DETAILS

DOB
Jul 22, 1992

Gender
Male

Nationality
Indian

Passport Number
N0880412

Marital Status
Married

Email ID
verma22shivam@gmail.com

LinkedIn
https://www.linkedin.com/in/shivam-verma-28415770/

Team Size
4

Role
Software Engineer

IDTracker is developed to track public information of any individual from different social sites and newsletters for organizational purposes. Any organization or company can use this application for background verification checks of its employees/customers. This application exposes the web service so that it can be integrated with any client application. Deployed the application in Amazon EC2 with Amazon RDS, and Amazon S3

Responsibilities & Achievements
- Handled the implementation of various tasks independently.
- Involved in the handling of database, Java-end architecture design, and front-end developments as well.
- Build the projects and deliver them to the end customers.

Project 3 - October 2016 - May 2017
Moonshot for Nimble Storage

Tools & Technologies
ServiceNow, Powershell, Sublime, Regex, ESXi Server, Nimble OS, Javascript

Team Size
6

Role
Software Engineer

This ServiceNow application leverages the management of the storage arrays and volumes. The application is able to

perform various operations on storage arrays like managing volumes, creating snapshots, protections, replications, synchronization. This application also provides a service catalog for volume provisioning.

Responsibilities & Achievements
- Handled the Research and Management of Nimble OS.
- Involved in the implementation of ServiceNow application on the basis of our research.
- Provide estimation of tasks based on requirement analysis

Project 4 - May 2017 - July 2020
Drive Manager

Tools & Technologies
Spring Boot, AngularJS, REST, H2, Eclipse, Brackets, Spring Framework, WIX, LazyLoad Framework, Lombok, SVN, Jacoco, Java, Linux, HTML, CSS

Team Size
10

Role
Senior Software Engineer

The Drive Manager is a Web-Based GUI to manage various storage devices on various systems. The Drive Manager software can be installed on a dedicated Management node or one of the various managed nodes hosting the storage devices (SSDs & HDDs). The tool is built with a multithreaded environment that supports multi-drive operation. Windows/Linux based installers are created via WIX. Spring Boot is the base we used for building the app

Responsibilities & Achievements
- Handled the team management , project responsibility and owned the project deliverables.

- Involved in all the project development phases and handling the team members as well.
- Individually handled and delivered the product on time.
- Provide estimation of tasks based on impact analysis.
- Ensuring Client engagement and timely deliverables.

Project 5 - August 2020 - Present 2021
Food Vertical

Tools & Technologies
IntellijIDEA, REST, MySQL, Spring Framework, Spring Boot, Lombok, Gitlab, Java, Lombok, MacOS, Redis, Apache Kafka, Jenkins, Orchestrator, Microservices, Amazon SQS, Amazon SNS, Amazon S3

Team Size
15

Role
SDE II

The Food Vertical is an app(android/iOS) covering a whole cycle of cooking, ordering, and delivering for the nearest locations with the support of clients, partners, and couriers.
It has its own products for serving to customers with different needs. It is based on a Fully Integrated business model for food delivery. It is a Microservice based architecture project working for the backend for consumer services. It has the base of Dropwizard for project development.

Responsibilities & Achievements
- Handled the project responsibility and owned the project deliverables.
- Involved in all the project development phases
- Provide estimation of tasks based on impact analysis.
- Ensuring Client engagement and timely deliverables.
