Overview

- Technical Professional with 12 years of experience in different areas of Software development and programming using Java/J2EE across various major domains like Banking, Insurance, Research and Development.

- Currently associated with Cognizant Technologies Limited Technical Consultant.

- Adept in end-to-end development of software products from requirement analysis, estimation, designing, coding, documentation, implementation and client interaction following Agile methodology.

- Have hands-on experience in machine learning tools like IBM Knowledge Studio and IBM Bluemix for creating tools/services which helps financial services.

- Awarded for my contribution made in R&D Project at Infosys Technologies Ltd., eAuction module in HP, JDI project from client Juniper.

- Certified in both technical (SCPJP 1.6, SCWCD 5, OCBCD EJB 3.0) and non-technical (Scaled Agile, NCFM) certifications to enhance skillset.

- Technical proficiency in Java, GIT repository, SpringBoot, EJB 3.0, IBM RSM, Docker with good communication & interpersonal skill.

- Experience using tools like Crucible, Jenkins, JIRA, HP ALM, Splunk, jConsole

Technical Experience

Relevant Technology	Years of Experience
Relevant Technical Experience:	
Java /Java 8	12/3
Spring Boot	3
EJB 3.0	3
Hibernate	3
SQL 5 /Oracle 11	3
IBM Bluemix WATSON	0.5
GIT/ Maven	3
Docker/ Kafka	1

Relevant Project Experience

Cognizant Technology Solutions	Kolkata, West Bengal, India	Mar 2020 – till date

Project Type	Aflac – EIS Suite Insurance
Role	Technical Consultant
Responsibilities	• Development ownership of 4 major microservice modules.
	• Involving in the design meetings.
	• Involving client calls 3-4 times solutioning technical deliverables and estimation.
	• Core hands-on development of business logic till deployment.
	• Designed and Developed Error Correction Framework for entire micro services modules.
	• Handling team of 10 members as a single point of contact for all technical needs.

EIT(HP) India Services/Manpower	Bangalore, Karnataka, India	Feb 2019 – Mar 2020

Project Type	eProcurement V2– Microservices
Role	Team Lead

Role	Developer
Responsibilitie s	• Development and Changes in eProcurement: Develop and design the code which involves the User Interface design (.xhtml), developing backend business logic and made the database level changes whenever required. • Modularization of eProcurement (eAuction): Modularization of eAuction using technologies like SEAM, Hibernate and EJB for better performance and scalability. • eProcurement Reporting: Design and develop the report template (jrxml file) using jasper iReport and to develop java code by which we can generate the pdf format report from that. • eProcurement POC on BI Tool: Design the report, developing the MDX query and install the bi-server in UNIX so that we can generate and view the report.

Infosys Ltd.   Bangalore, Karnataka, India   May 2011 – Jul 2011

Project Type	Billing Portal
Role	Developer
Responsibilities	• My responsibilities in this project are to develop the login module using IBM RAD tool (J2EE) and maintain the MySql database as

an administrator.

Infosys Ltd.   Bangalore, Karnataka, India   Feb 2009 – Apr 2011

Project Type   Image Processing (Research and Development)
Role   Research and Development
Responsibilities

- Self-Development and contribution to Research, Consulting and Systems Development: I was completely focused on my research work and have implemented different image processing algorithms like: Corner Detection, Image filters (Laplace, Gaussian etc.), and Eye detection in different colour spaces like YCbCr, RGB and HSI.
- Face Detection of color images using color and color-independent methods: Towards achieving this particular target I have done some explorative work and completed the following activities Illumination Compensation, Integral Image, Template Matching, Adaptive skin detection by which we can find a face from an image. Also I have worked on developing image search based on a person's face.
